### ABOUT THE RANGE:

One of the first boiler hire companies to set the trend using Oil fired Condensing plant rooms. This highly efficient Hoval boiler offers our customers super low NOx and operates on HVO Green D fuel. Built and housed in a bespoke frame this unit promotes reliability and efficiency and looks quality in the process and is second to none in terms of energy efficiency and economy.

#### How it works:

Separate high and low temperature returns create ideal conditions for condensation, thereby enhancing energy recovery from the exhaust gases. 2-stage low NOx oil burner adjusts output to need and reduces the frequency of starts/stops, thus ensuring clean, low-emission and energy-saving combustion.

- ✓ Environmentally Friendly
- ✓ Low Carbon Footprint
- ✓ Modular approach
- ✓ Full Remote Monitoring

### UNIT SPECIFICATION:

Duty:	300kw
Dimensions:	(W) 1.4 X (L) 3.74 (H) 2.4
Power:	16amp single phase
HTG Outlets:	2" PN16
Primary pump/shunt:	50/120 F
Expansion:	300 Ltr
Remote monitoring:	YES
Pressurisation unit :	YES
Boiler:	Hoval Ultra Oil
